While California is often on the forefront of technology, our Rules of Professional Conduct only recently formally stated the import of technology competence in a new comment to Rule 1.1 (Competence). This CLE is designed to help attorneys navigate the intersection of ethics and cybersecurity technology competence. We will walk you through the components of good cyber hygiene, including risk assessment, adopting a cybersecurity policy and incident response plan, training, and third party management.

Topics

- What is the Cyber Threat Landscape?
- Why are law firms vulnerable to cyber risks and challenges?
- What professional and legal requirements apply?
- What ethics opinions offer guidance?
- How can law firms improve their cyber hygiene?
- Best practice tips
