

The International Law Section presents

## Space Law! What Is It, And What Might The Future Hold?

### Speakers

**U.S. Representative Ami Bera, M.D. (D-CA-7)**  
U.S. House Committee on Science, Space and Technology

### Deborah Plunkett

Director, Aviation and Space Law with the Office of the General Counsel  
U.S. Air Force

### Charles A. Blanchard

Partner and Co-Leader, Aerospace, Defense & National Security  
Arnold & Porter LLP

### Moderator

### John Muse-Fisher

Senior Associate, International Arbitration, Arnold & Porter LLP

The subject of Space Law is as indefinite as Space itself. During this panel, we'll discuss the current contours of Space Law, as well as some potential issues that may arise as the use of Space increases at a rapid pace. For example, is the existing international legal architecture for Space sufficient as more and more private entities displace nation-States as the primary Space-going actors? How should the increasing amount of Space material and defunct Space "junk" be regulated to avoid collisions and Space pollution? How might national security regulations apply to private actors operating in Space? How can domestic legislation in the United States promote peaceful and commercial uses of Space?

### Topics

- Space Law and International Law
- Space Law and Domestic Law
- Transactional Law and Space-related Activities
- Space Law and Legislation
- International Arbitration and Space Law
