Our Justice System is Under Threat

The principles of judicial independence and the independence of the legal profession – cornerstones of American democracy – are facing unprecedented challenges across the country. Attacks on judges for unpopular rulings, political pressure on legal professionals, and a growing distrust of the legal system threaten the very foundation of fairness and equal justice.

These aren't abstract legal concepts. They directly impact every citizen's ability to have their rights protected and their voices heard. When the rule of law is weakened, our entire nation suffers. Join The Bar Association of San Francisco and legal organizations across the country May 1st to support the rule of law and have your voice heard!
