

The Cybersecurity and Privacy Law Section presents

AI, Cybersecurity, and Privacy Section Conference - 2026

11:45 a.m. - 12:15 p.m. | MCLE Registration

12:15 - 1:00 p.m. | Lunch & Keynote with Q&A

Keynote Speaker

Lara Kehoe Hoffman, Assistant Chief Counsel of Enforcement, California Privacy Protection Agency

1:00 - 1:15 p.m. Break

1:15 - 2:15 p.m. | MCLE: 1 Hour

Panel I: Navigating CA's Newest Consumer Privacy Act Requirements

What Businesses Need to Know About Mandatory CCPA Risk Assessments and Cybersecurity Audits

California's CCPA regulations finalized in September of 2025, mark the most significant expansion of the state's privacy law to date, introducing new requirements for automated decision-making technology (ADMT), mandatory risk assessments, and annual cybersecurity audits. With phased compliance deadlines beginning January 1, 2026, businesses need to act now (if they haven't already) in order to comply.

Join our panel of privacy, cybersecurity and technology law experts for a practical, one-hour briefing on what these changes mean and how to prepare. Panelists will break down what triggers a mandatory risk assessment, who must conduct cybersecurity audits and by when, and the near-term steps companies should take to confidently prepare an effective compliance program.

Topics

- CCPA Risk Assessment Triggers
- CCPA Risk Assessment Best Practices
- CCPA Cybersecurity Audit Requirements
- Difference between CCPA Audit Requirements and other well-known security audits
- Practical advice on effectively preparing for an independent CCPA cybersecurity audit

Speakers

Philip J. Wiese, Coblenz Patch Duffy & Bass
Elizabeth Hsieh Lee, Former Chief Privacy Officer, UCLA Health
Ryan Smyth, FTI Consulting

Moderator

Julie Matsumoto, Juniper Networks

2:15 - 2:25 p.m. | Break

2:25 - 3:25 p.m. | MCLE: 1 Hour

Panel II: Protecting Kids Online

Legislative and Enforcement Trends Shaping the Digital Ecosystem

As lawmakers and regulators continue to prioritize children's online safety, organizations face an increasingly complex and rapidly changing compliance landscape. This panel will examine the latest legislative proposals, FTC enforcement priorities, state regulatory initiatives, and selected international developments affecting digital products and online services. Attendees will gain practical insights into emerging legal obligations, enforcement trends, and compliance strategies to better advise clients, assess legal risk, and prepare for future regulatory changes.

Topics

- Legislative development, such as the KIDS Act at the federal level
- State level laws and judicial interpretations on these laws (such as the Texas law on age verification)
- Noteworthy international development and trends on online safety
- FTC action on kids' safety
- State AG and privacy action trends related to kids' safety

Speakers

Jennifer Howes, Latham & Watkins
Emily Yu, Roblox
Joe Newman, K-ID

Moderator

The Cybersecurity and Privacy Law Section presents

AI, Cybersecurity, and Privacy Section Conference - 2026

3:25 - 4:45 p.m. | MCLE: 1 Hour

Panel III: Guardrails and Gavel: Where Privacy Meets AI

Governance Sets the Guardrails. Litigation Brings the Gavel. Privacy Law is Writing AI's Rules Either Way

As AI adoption accelerates, privacy law has become the default framework regulators, plaintiffs, and courts are using to govern it, often filling gaps left by the absence of comprehensive federal AI legislation. This program brings together governance, compliance, and litigation perspectives to give attorneys a practical, end-to-end view of AI-related privacy risk.

Panelists will discuss how organizations are building AI governance based on existing privacy frameworks and statutes, that anticipate privacy obligations before regulators or plaintiffs force the issue, and how existing privacy statutes — CCPA, GDPR, and BIPA among them — are being mapped onto AI development and deployment lifecycles in real time. The panel will also examine the litigation trends already reshaping legal exposure, including training-data lawsuits, biometric privacy claims, and challenges to automated decision-making systems.

Because AI and privacy risk doesn't look the same everywhere, the discussion will address how considerations shift by context — B2B vendor relationships versus B2C consumer products, public versus private companies, and industry-specific regulatory overlays in sectors like healthcare, finance, and employment. Attendees will leave with practical risk mitigation strategies for building a defensible AI system, along with a framework for assessing litigation and regulatory exposure both before and during deployment.

Topics

- Building AI governance frameworks that anticipate privacy law before regulators or plaintiffs do
- Mapping CCPA, GDPR, and BIPA compliance obligations onto AI development and deployment lifecycles
- Litigation trends reshaping legal exposure — training-data suits, biometric privacy claims, and automated decision-making challenges
- How privacy and AI risk differs by context — B2B vendor relationships vs. B2C consumer products, public vs. private companies, and industry-specific regulatory overlays (healthcare, finance, employment)
- Practical risk mitigation strategies for building a defensible AI system before a claim or audit forces the issue
- Assessing litigation and regulatory exposure before and during AI deployment

Speakers

Abbey Barrera, Gibson Dunn
Daniel Clarke, Truyo
Natasha Schissler, Intel
